What does it mean to say that we live in a secular age? This apparently simple question opens into the massive provocative and complex a secular age where Charles Taylor positions secularism as a defining feature of the modern world not the mere absence of religion and casts light on the experience of transcendence that scientific explanations of the world tend to neglect in varieties of secularism in a secular age a prominent and varied group of scholars chart the conversations in

how can the church navigate the challenges of our secular age in the church in a secular age norwegian and pentecostal scholar silje kvamme bjordal takes on three dynamic thinkers each in their own way in search for insights to this question philosopher charles taylor offers the backdrop for the conversation as bjordal carefully sifts out some of his most central tenets for understanding our secular age bjordal then turns to the theologian and ethicist stanley hauerwas and critically engages his notion of the church as a community set apart from our secular age by bringing several of hauerwas s interlocutors into the conversation bjordal manages to bring out both the acute relevance and the shortcomings of his ecclesiology thus she finds that another turn is needed in order to offer a concrete as well as creative contribution to this ecclesiological conversation considering the undeveloped pneumatological undercurrent in hauerwas s work it proves fruitful to engage the leading pentecostal scholar amos yong and his foundational pneumatology this engagement results in a shift of agency from the community to the spirit and keeping up the dialogue with taylor s secular age bjordal demonstrates how the spirit s agency is crucial for the church as it attempts to navigate the particular challenges and opportunities of a secular age

how to invest in a secular bear market is a sequel to alexander s 2000 book stock cycles which forecast the start of a secular bear market a lengthy period of poor investment performance alexander describes the structure of a secular bear market and explains why they happen he then shows what an investor can expect from this secular bear market over the next 5 10 years and provides some investing strategies this is a brilliant and scholarly study that looks to create longer term capital gains in retirement accounts based on cycle investing what i found particularly fascinating was the very detailed and well researched studies on the socio economic cultural cycles of change throughout history wear your thinking cap as the author shows you how to capitalize on these cycles in your ira and 401 k accounts mohan 21st century futures this is a must read for anyone interested in the business cycles and their impact on investment dynamics and making money in the stock market the book brings together multiple cycle theories in a comprehensive reading style bruce gulliver editor torpedo watch

society for the scientific study of religion includes bibliographies and index

are we still secular if not what can one possibly mean by â post secularâ the answers depend on what one considers secular as well as the people societies and institutions that one considers post

secular society argues for the experience of living in a secular world and a secular age and the experience of living without religion as a normal condition religion in the western world is often described as being marked to some degree by both innovation and disarray the past couple of decades have seen the emergence of reformulated versions of theories of secularization variants of rational choice and supply side models of religion and new theoretical perspectives on de secularization of religion in spite of these different approaches and perspectives a majority of scholars agree that the west is experiencing a general â resurgenceâ of religion and that the public visibility of religious actors and discourses is on the rise across most western societies post secular society discusses the changes in religion related to globalization as well as new age and other forms of popular religion the contributors review religion that is rooted in the globalized political economy and the relationship of post secularism to popular and consumer culture they also detail current innovative discourse as a religious belief system discuss theories of the post secular religious and spiritual well being and consider healing practices in finland and environmentalism

fewer canadians identify with a religion believe in a god or attend weekly religious services than in past decades what explains higher and lower levels of religiosity is secularization a myth or reality what impact does religiosity or secularity have on a society s social and civil fabric in the meaning of sunday joel thiessen addresses these questions by weaving together narratives gathered from interviews with various members of the religious and secular communities exploring the meanings and motivations behind people s religious beliefs and behaviours the book features discussions with three categories of people those who attend religious services weekly those who attend services mainly for religious holidays and rites of passage and those who do not identify with any religious group and never attend religious services interview responses show that religiosity levels correlate to one s personal experiences with the supernatural religious organizations and their social ties to those who either encourage or discourage religious identification belief or practice concluding that the demand for religion is waning regardless of what religious groups include in their programs thiessen suggests that apart from some initial social and civic concern canadian society may be just fine without it testing two dominant theories in the sociology of religion secularization and rational choice theory the meaning of sunday provides in depth qualitative research on people s lived religion and contributes to a major ongoing debate concerning the nature and importance of religion in contemporary society

in the course of a long and distinguished academic and civic career the canadian philosopher charles taylor has been for articulate atheists and learned believers alike an incisive insightful gracious and challenging conversation partner on issues that arise at the intersection and interaction of religion society and culture grace and freedom in a secular age offers a concise exposition of key ideas contingency otherness freedom vulnerability and mutuality that inform his probing analyses of the dynamics of religious belief and religious denial in the pervasive

contemporary culture he calls a secular age within which religious belief and practice have for many become just an option those ideas provide the basis from which rossi argues that despite a clear eyed recognition of the deep fractures of meaning and the pervasive fragmentation of once stable societal connections that a secular age has brought in its wake taylor also sees and affirms strong grounds for hope in a healing of our broken and fractured world and for the possibilities and the importance of active human participation in that healing taylor points to signs indicative of potent re compositions and renewals taking place in religious belief and practice from its interaction with the dynamics of secular culture particularly ones that make possible radical enactments of deeper human solidarity and mutuality of which the one most often potent is the reconciliation of enemies in pointing out these signs taylor suggests a richly expansive reading of the christian doctrine of creation as it marks the radical contingency of all that is upon a freely bestowed divine self giving creation is the ongoing enactment of the divine hospitality of the triune god

churches often realize they need to change but if they re not careful the way they change can hurt more than help in this culmination of his well received ministry in a secular age trilogy leading practical theologian andrew root offers a new paradigm for understanding the congregation in contemporary ministry he articulates why congregations feel pressured by the speed of change in modern life and encourages an approach that doesn t fall into the negative traps of our secular age living in late modernity means our lives are constantly accelerated and calls for change in the church often support this call to speed up root asserts that the recent push toward innovation in churches has led to an acceleration of congregational life that strips the sacred out of time many congregations are simply unable to keep up which leads to burnout and depression when things move too fast we feel alienated from life and the voice of a living god the congregation in a secular age calls congregations to reimagine what change is and how to live into this future helping them move from relevance to resonance

although historians have suggested for some time that we move away from the assumption of a necessary clash between science and religion the conflict narrative persists in contemporary discourse but why and how do we really know what people actually think about evolutionary science let alone the many and varied ways in which it might relate to individual belief in this multidisciplinary volume experts in history and philosophy of science oral history sociology of religion social psychology and science communication and public engagement look beyond two warring systems of thought they consider a far more complex multifaceted and distinctly more interesting picture of how differing groups along a spectrum of worldviews including atheistic agnostic and faith groups relate to and form the ongoing narrative of a necessary clash between

evolution and faith by ascribing agency to the public from the nineteenth century to the present and across Canada and the United Kingdom. This volume offers a much more nuanced analysis of people's perceptions about the relationship between evolutionary science, religion, and personal belief, one that better elucidates the complexities not only of that relationship but of actual lived experience.
