this book provides an intuitive yet sound understanding of how structure and
 properties of solids may be related the natural link is provided by the band theory
 approach to the electronic structure of solids the chemically insightful concept of
 orbital interaction and the essential machinery of band theory are used throughout
 the book to build links between the crystal and electronic structure of periodic
 systems in such a way it is shown how important tools for understanding properties
 of solids like the density of states the fermi surface etc can be qualitatively sketched
 and used to either understand the results of quantitative calculations or to rationalize
 experimental observations extensive use of the orbital interaction approach appears
 to be a very efficient way of building bridges between physically and chemically
 based notions to understand the structure and properties of solids

the significance of the present iau symposium the large scale structure of the
 universe fortunately requires no elaboration by the editors the quality of the wide
 range of observational and theoretical astrophysics contained in this volume speaks
 for itself the published version of the proceedings contains all the contributions
 presented at the symposium with the exception of the introductory lecture by v a

ambartsumian contributed papers short contributions and discussions have been included according to the recommendations of the iau many people contributed to the success of the symposium first of all thanks are due to the ussr academy of sciences and to the estonian academy of sciences for sponsoring this symposium in tallinn the efforts of academician k rebane president of the estonian academy of sciences are particularly appreciated the astronomical hosts of the symposium were the members of the w struve astrophysical observatory of tartu who made outstanding efforts to lavish participants with estonian hospitality which was greatly appreciated and enjoyed by them and their guests the members of the scientific and local organising committees are listed below and we thank all of them for their contributions which were central to the success of the symposium in addition are listed members of the technical organising committee who were responsible for all details of the organisation and whose vigilance ensured that all aspects of the symposium ran smoothly and efficiently their contributions are all gratefully acknowledged

hair is a sophisticated bio based material whether it is on a human head or part of a mammalian coat in particular the role of the proteins in the follicle integral to hair development are not well understood this new book seeks to integrate the latest research in proteomic and morphological studies into a coherent description of fibre development from the follicle to its final mature keratinized form to achieve this the book has been divided into three sections the first describes the keratins their associated proteins and how they assemble into intermediate filaments in the fibre the second covers the latest information on the morphological changes that occur from the base of the follicle through the keratinization process to the mature fibre and the role that proteins play in this the final section delves into fundamental fibre properties such as crosslinking thermal and oxidative modifications and how these affect the mature fibre the editors of this book are internationally recognised for their work in the area of mammalian hair jeffrey plowman for his knowledge of the proteomics of the fibre santanu deb choudhury for his work in the area of crosslinking in the fibre and duane harland for his understanding of the morphological

development of the fibre together they have collected material from other international experts leopold eckhart and florian ehrlich for their knowledge of the evolution of keratins dong dong wu and david irwin for their studies on keratin associated protein evolution david parry and bruce fraser for their work on keratin and keratin associated protein structure and assembly john mckinnon for his studies on macrofibril formation crisan popescu for the thermodynamics of keratins and jolon dyer for his oxidative modification studies of keratins this book provides a comprehensive introduction and useful reference guide to hair biology and will be of interest to both scientists and technologists

covers all the published and all the important unpublished decisions and opinions of the department of the interior
