in the problem of the idea of culture in john paul ii exposing the disruptive agency of the philosophy of karol wojtyla john corrigan provides a new lens with which to view and understand the philosophy of karol wojtyla john paul ii he exposes wojtyla as a major player in contemporary philosophical debates the work reformulates the problem of experience in light of the questions surrounding our idea of culture corrigan argues that for wojtyla the drama of the problem of experience manifests in the apparently divergent accounts of the meaning of human experience as presented by the philosophies of being and of consciousness solving this conundrum results in an idea of the person capable of explaining human experience in relation to human culture unfolding the experiences of self knowledge conscience and the ontic causal relationship of the person to human culture the first part of the book concerns formal considerations regarding the constitutive aspects of wojtyla s approach while the second part deals with pragmatic considerations drawn from his comments on culture

this book presents a unified and systematic philosophical account of human actions

and their explanation and it does it in the spirit of scientific realism in addition various other related topics such as psychological concept formation and the nature of mental events and states are discussed this is due to the fact that the key problems in the philosophy of psychology are interconnected to a high degree this interwovenness has affected the discussion of these problems in that often the same topic is discussed in several contexts in the book i hope the reader does not find this too frustrating the theory of action developed in this book especially in its latter half is a causalist one in a sense it can be regarded as an explication and refinement of a typical common sense view of actions and the mental episodes causally responsible for them it has of course not been possible to discuss all the relevant philosophical problems in great detail even if i have regarded it as necessary to give a brief treatment of relatively many problems rather i have concentrated on some key issues and hope that future research will help to clarify the rest
