catholic education stands in need of renewal for it too has experienced the consequences of the rupture of faith and reason in the modern period secularism affects catholic schools as well as public ones when faith remains confined solely to a religion class or the celebration of the mass our past provides a model of integration the unity of divine revelations and the liberal arts and a life of wisdom that pursues what is truly highest modern people too often settle for less little comforts and distractions while the theologians philosophers and educators of the past spur us on to stop at nothing less than god s invitation to enter his divine life this first volume of the adeodatus handbook seeks to provide inspiration to return to the central vision of catholic education an integrated approach to the liberal arts that flows from god s initiative toward us and is ordered toward eternal union with him the essays of this volume unfold the narrative offered in this introduction in more detail we consider them to be the most essential figures who have established the catholic approach to education two of them plato and aristotle were pagan authors who formed the philosophical basis of the catholic approach the others flowing from the incarnation of the son of god appropriated the truths of nature contemplated by philosophy and drew them into a sacramental synthesis with the truths of divine revelation there can be no genuine christian education that does help the student to contemplate the whole of reality and to live a life of wisdom rooted in the virtues that perfect human nature while ultimately receptive of the gifts and fruits of the holy spirit the majority of the figures addressed in this volume are canonized saints pointing us to the priority of holiness in catholic education education serves the ultimate aim of human life our perfect happiness in the beatific vision to reach this we need the support of mentors and friends this requires the concrete embodiment of christian community within the home and school it

can also however flow from our communion with the great sainted educators of our heritage we have inherited their legacy and with their prayers and support we have been tasked with continuing in our own age we will not be able to replicate their efforts but with the grace and inspiration of the holy spirit we can make our contribution in educating the youth young adults seminarians and lay people of the church of god

any number of misconceptions about millenarians and messianism in the early modern period will be laid to rest by a reading of this volume it is too often thought that millenarianism was largely an english phenomenon one of the reasons for bringing these studies together is to show as martin mulso puts it that we can understand this european wide movement as a millenarian international in analogy with the later socialist international another misconception is that millenarianism and messianism were a world apart from mainstream developments in intellectual history but as mulso also insists a proper understanding of millenarianism places it in the context of the growth and stabilization of science material progress and political reform a third mistake is to conclude too quickly that millenarianism and messianism have formed a single monolithic bloc in history but we learn in this volume that there were all sorts of millenarians readers of this volume will be struck by at least two things one is the sheer numbers of millenarian thinkers to be found throughout europe in the early modern period especially north of the mediterranean we will not list them all here but the index to this book contains dozens and dozens of them the second striking point is the amount of work that remains to be done for every millenarian that we explore and explain here several are mentioned about which little is known
