the theology of the last things has long been and still is a source of confusion and contention among christians indeed the century just past could be called the century of eschatology in that century theologians such as albert schweitzer c h dodd rudolf bultmann oscar cullmann and karl barth loom large on a popular level the end of the second millennium was replete with predictions of the end or the rapture or the great tribulation and such predictions have not ceased this being so the field of eschatology the theology of the consummation of the cosmos should be of interest to every christian not just those who are theologians this collection of chapters brings eschatology into conversation with a wide variety of disciplines including scripture patristic and medieval theology philosophy and history the result is a scholarly volume that enriches both eschatology and the fields with which each contributor engages eschatology at the beginning of the third millennium will help pastors and catechists in their ministries to understand more deeply the riches of a theology which is about much more than the end times

as students of the civil war have long known emancipation was not merely a product of lincoln s proclamation or of confederate defeat in april 1865 it was a process that required more than legal or military action with enslaved people fully engaged as actors emancipation necessitated a fundamental reordering of a way of life whose implications

stretched well beyond the former slave states slavery did not die quietly or quickly nor did freedom fulfill every dream of the enslaved or their allies the process unfolded unevenly in this sweeping reappraisal of slavery's end during the civil war era joseph p reidy employs the lenses of time space and individuals sense of personal and social belonging to understand how participants and witnesses coped with drastic change its erratic pace and its unforeseeable consequences emancipation disrupted everyday habits causing sensations of disorientation that sometimes intensified the experience of reality and sometimes muddled it while these illusions of emancipation often mixed disappointment with hope through periods of even intense frustration they sustained the promise that the struggle for freedom would result in victory

in this book i pursue three goals the first is to describe what has been learned about human freedom through psychological research the second is to provide a conceptual and methodological critique of the large body of that research which has been conducted within the framework of a positivist natural science experimental social psychology my third goal is to offer a contrasting human science approach to the study of human freedom and to illustrate its use in empirical study for more than twenty years psychologists have investigated the conditions under which people are seen to be free the conditions under which they report feeling free the psychological consequences of interference with behavioural freedoms and to a lesser extent how it feels to feel free empirical findings on each of these facets of human freedom have arisen in quite separate research traditions and they are brought together here for the first time during the same twenty years a general critique of the dominant positivist natural science approach to complex human phenomena has been growing although it has escalated recently this critique has firm roots that go back to the turn of the century i review this general critique and apply it specifically to the study of human freedom surely a complex human phenomenon more complex ambiguous and paradoxical than most of us imagine
