we cannot think of modern society without also thinking of video games and we cannot think of video games without thinking of history either games that deal with history are sold in ever increasing numbers striving to create increasingly lively images of things past for the science of history this means that the presentation of historical content in such games has to be questioned as well as the conceptions of history they embody how do games create the feeling that they portray a past acceptable to their players do these popular representations of history intersect with academic narratives or not while a considerable body of work on similar questions already exists both for medieval history as well as for those games dealing with the 20th century early modernity has not yet been treated in this context as many games draw their imagery perhaps their success too from the years between 1450 and 1815 it is to their understanding that this volume is dedicated the contributions encompass a wide range of subjects and games from age of empires to assassin s creed from critical discourse analysis to ludology one aim unites them namely an understanding of what happens when video games encounter early modernity

there are few grand narratives that loom over asian americans more than the model minority while many asian americanist scholars and activists are quick to disprove the model minority as myth author takeo rivera instead rethinks the model minority as cultural politics rather than disproving the model minority rivera instead argues that asian americans have formulated their racial and gendered subjectivities in relation to the model minority relation that rivera terms model minority masochism with specific attention to hegemonic masculine asian american cultural production rivera details two complementary forms of contemporary racial masochism a self subjugating masochism which embraces the model minority and its opposite a self flagellating masochism that punishes oneself for having been associated with the model minority at all

this thesis examines implicit and explicit connections between transhumanist ideas and video games based on a critical analysis of deus ex human revolution it first outlines the main points of the modern debate between transhumanists and bioconservatives then moves on to describe the role that transhumanism has played in some of the arts we can observe the fact that video games implicitly promote a transhumanist outlook due to their mechanical nature even though there are examples of games that explicitly engage with the many issues of technological development we also learn that video games require different academic approaches due to their inherent diversity in style and purpose the analysis of deus ex human revolution reveals it to be a video game that maintains a critical perspective towards transhumanism even though its mechanical nature implicitly promotes ideas of techno progressivism through the act of immersing the player into its virtual environment and motivating them to reflect on socially relevant issues human revolution can like many other futuristic role playing video games with a high level of player agency influence the player s later decisions in life and motivate them to develop an actively transformative outlook on their real life society
