in blind evolution the nature of humanity and the origin of life professor david frost challenges the dominant worldview derived from darwin s evolutionary theories and perpetuated in richard dawkins s atheistic propaganda for neo darwinism that our universe has at bottom no design no purpose no evil and no good nothing but blind pitiless indifference frost deploys recent findings from a range of scientific studies that shake neo darwinism to its foundation citing entertaining examples from the inner workings of a single cell to the animal kingdom at large from elephants and giraffes to the japanese pufferfish frost maintains that darwinian premises are wholly inadequate to engage with life or to provide a framework for our experiences of joy and sorrow the problem of suffering and the stark realities of good and evil reflecting on the nature of existence frost points to a mode of human understanding parallel to scientific enquiry through the path of vision accessed via the nous or spiritual intellect he argues that vision is as much essential to our understanding of creation as is scientific enquiry reality is best approached through a complementary partnership of both

many people whether educators or not will agree that an education that does not inspire wonder is barren wonder is commonly perceived as akin to curiosity as stimulating inquiry and as something that enhances pleasure in learning but there are many experiences of wonder that do not have an obvious place in education in wonder and education anders schinkel theorises a kind of wonder with less obvious yet fundamental educational importance which he calls contemplative wonder contemplative wonder disrupts frameworks of understanding that are taken for granted and perceived as natural and draws our attention to the world behind our constructions sparking our interest in the world as something worth attending to for its own sake rather than for our purposes it opens up space for the consideration of radical alternatives wherever it occurs and in many cases is linked with deep experiences of value therefore it is not just important for education in general but also more specifically for moral and political education
